

# 222 Remington

with 50-grain TNT® Green™

## LABNOTES

As it approaches its 60th anniversary, the 222 Remington is still an excellent and accurate varmint cartridge. Speer's TNT® Green varmint bullet gives 222 Remington reloaders the option of a lead-free bullet.

The original specifications for the 222 Remington call for a 1-in-14 inch rifling twist. If your rifle has this twist rate, you may find that the 43-grain TNT Green gives better downrange accuracy. The longer 50-grain version is fine in rifles with faster twist rates.

TNT Green bullets are longer than conventional bullets of the same weight, so it is important to follow these charge weight recommendations. Do not use data for any other bullet when loading TNT Green bullets.

0.224"	TNT Green
